Thank you for choosing the PROtect 49er kit.

This kit has been designed by Nathan Outteridge and Iain Jensen

- Remove stains from the surface, clean and make sure is dry

CHAFE

- All items have been designed and cut for the purpose but round corners will bring additional adhesion
- Remove the liner
- Once in position, pressure the product from the centre and move to the edges to eliminate air trapped between the product and the surface.

MASK

- PML050 has 300% elongation at break so gently pull it and wrap around the item with 25%-50% overlap
- To close it do not tear the tape but cut using a scissor or a cutter.

Please do not hesitate to contact us for further information, details and suggestions

#	Part code	Gauge μm	Product	Color	Area	Purpose	Width	Length	Qty	
1	PCT125	125	Chafe	PCT125	translucent	Hull	Pole Launcher	51	0,2	2
